### SUMMARY

Over 2 years of experience making full stack applications and projects using popular technologies such as NextJS, NodeJS, MySQL, AWS and more. Largely self taught; learned most of what I know through online courses, tutorials, and creating personal projects. Looking to further improve my skills and gain experience within a professional setting; expanding my expertise to other fields of programming and software development.

### EXPERIENCE

#### Uncrafted Design, Toronto, ON

##### *Professional Development*

January 2022 - Present

- Learning industry standard technologies and developing my understanding of core web application properties.
- Creating personal projects that reflect my progress and showcase my proficiency and skills.

#### Integrity IT Solutions, Toronto, ON

##### *IT Field Technician*

March 2019 - January 2022

- Working in partnership with Telus Communications; completing Kroll software setups, workflow and upgrades at contracted pharmacies.
- Setting up network, computers, peripherals and software in compliance with Telus and Integrity protocols.
- Completing thorough check of software to ensure peripherals are communicating correctly and pharmacists are able to fill prescriptions and carry out all necessary tasks.
- Recording and logging any issues raised during install and compiling a complete report of the install to be placed under the client's record.

#### Paramount Eventspace, Woodbridge, ON

##### *Bartender*

March 2019 - April 2021

- Setting up and opening bar according to the client's instructions.
- Maintaining a clean environment while serving guests in compliance with smart serve training.
- Closing, restocking and cleaning bar to ensure a safe and hygienic workspace.
